

Who we are

GS Manufacturing is a leading producer of composite fabrication equipment. Our complete line of composite processing equipment includes choppers, gelcoaters, rtm, granite spray systems and much more. We are the pioneers of high-flow structural adhesive and putty dispensing systems for the composite industry. Family owned and operated since 1971, we have developed a solution based strategy for our clients that is unparalleled.

This requires the orchestration of many different moving parts, but our key philosophy in one word is teamwork. From the front office to the engineering department and the fabrication shop to the warehouse... teamwork is everything at GS Manufacturing. But it doesn't stop there, just as importantly, we believe that an ongoing relationship through teamwork with our customers is the only way to provide the best quality products, service and support.

You might say we are problem solvers. Our years of experience and knowledge is often sought after to solve many different dispensing applications when the competition has failed.

Many of the larger companies in our industry have a take it or leave it approach. We do just the opposite. Our team of highly trained and specialized engineers and tradesman will come up with specific solutions that will save you time and, of course, money. We create unique and creative applications for your composite dispensing needs.

We proudly serve these industries...

*Wind Power, Marine, Rail, RV, Automotive,
Truck, Tub & Shower, Swimming Pools,
Jacuzzis, Water Park & Playground,
Storage Tank, Architectural,
Recreational Products*

Customer Service

Here at GS we believe great customer service is about relationships. It's as important to a business as the products themselves... and it should be an intrinsic extension of the business.

We pride ourselves with knowing that when you call we will be there to help with technical know how and support all with a smile!

*The Pioneer of High Flow Structural
Adhesive Dispensing Systems*

**Complete Custom
Engineering & Fabrication**

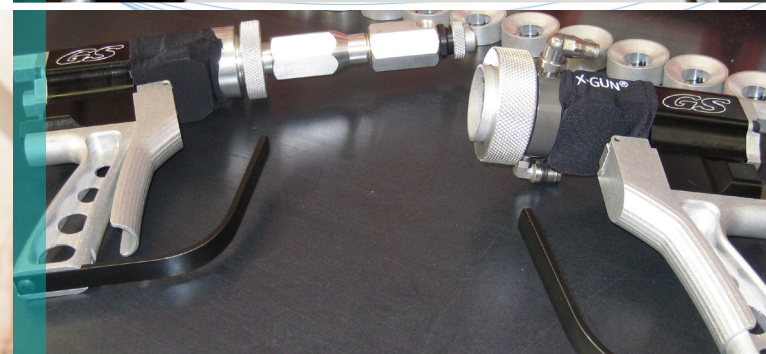

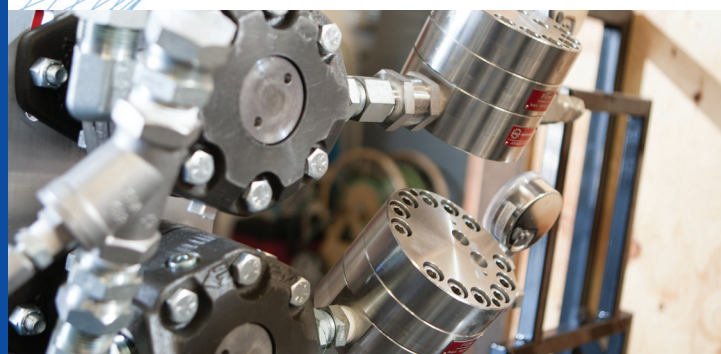

We offer next day delivery on parts, have several distributors worldwide and service technicians on hand to help with trouble shooting!

Custom Engineering

It all starts with creative solutions designed by our experienced engineering department. Through 3D and CAD programs our ideas become your products with exact specifications. And our state of the art computer controlled machine and fabrication equipment allows us to create just about any dispensing application you can imagine.

We are able to design custom systems large companies can't because we can get things done quicker with less red tape!

Superior Technology

Our In-House R & D program allows us to evaluate new cutting edge technology and special applications for customers and chemical suppliers... such as flow monitors, batch counters, custom PLC controls, battery operated ratio alarms and much more.

We offer a wide variety of piston and gear pumps to accommodate all of your dispensing needs that are robust and built to last. The new and improved X-GUN® with its patent pending direct flow design reduces clogging and lowers fluid pressure. Featuring our proven pneumatic ball valve design which eliminates troublesome needles and no exposed moving parts. Ideal for high viscosity and heavily filled materials such as sprayable granite coatings and coring materials.

X2015GL Gelcoat X-GUN®

The X-GUN® is the only gun you need! The versatile design of the X-GUN® can be used for all applications allowing the user to stock common parts.

- *low emission gelcoat*
- *resin transfer*
- *infusion*
- *non-atomized resin chop/wet-out*
- *robotics*
- *meter/mix structural adhesives and putties*
- *epoxies/urethanes*

"Customer service is not a department... it's everyone's job!"
